May 6, 2025

TOWNSHIP OF ROSE
9080 MASON STREET
HOLLY, MI 48309

Dear Sir or Madam:

The Oakland County Health Division (OCHD) will begin the bathing beach sampling season on June 2, 2025. One hundred (100) beaches on seventy (70) different lakes, throughout the county, will be sampled. Sampling is expected to continue for ten weeks. OCHD staff will be surveying beaches beginning May 27th and will start routine sampling the following week.

Beaches are sampled and tested for E. Coli bacteria consistent with Michigan Department of Environment, Great Lakes, and Energy (EGLE) Public Bathing Beach Law (Public Act 368 of 1978). Samples are calculated to determine daily geometric means which must not exceed 300 colonies per 100 milliliters of water. Secondly, the results must not exceed 30-day geometric means (after five sampling events) of 130 colonies per 100 milliliters. If samples exceed these limits, beaches will be closed until acceptable results are obtained.

This year the Oakland County Health Division will be sampling at the following beaches in your area:

LAKE	BEACH
Green	Camp Wathana
Elliot	Maryville Retreat Center
Fish	Camp Ohiyesa - North
Tipsico	Brown's Landing Mobile Home Park

OCHD will post beach closure and re-opening information on our website at:

<https://www.oakgov.com/community/health/public-health-services/environmental-health/beaches>. Also, sample results will be listed on the EGLE Beach Monitoring website: <https://www.egle.state.mi.us/beach/>. Information will be posted on both sites as soon as available from the laboratory.

As a courtesy, you will be informed of beach closures in your area through the e-mail address you provided. Please feel free to visit the above referenced websites for beach closure information. Contact me at (248) 858-1312 should you have any questions or wish to update contact information.

Sincerely,
